

NEW RESIDENTIAL ORGANICS RECYCLING PROGRAM

Got Food Scraps? WE WANT THEM!

The Curbside Organics Program is here. Residents help us divert food waste from our landfills and help the Town and the State of California meet its SB 1383 Climate Goals.

Get to know your
**NEW FOOD WASTE
RECYCLING PROGRAM**

WHEN IS MY ORGANIC RECYCLING DAY?

Your organic collection is the same as your trash and recycling. Your service schedule does not change.

WHY RECYCLE FOOD SCRAPS?

California's SB 1383 is a law that requires cities to provide a community-wide organic recycling program. Food waste is one of the largest components of trash sent to landfills. However, food waste is not trash, it is a valuable resource turned into useful compost.

WHY IS COMPOST IMPORTANT?

Compost is a soil additive that enriches our soil. Compost benefits our landscape by preventing soil erosion, stabilizing water levels, and much more. By recycling your food scraps, you are reducing waste and creating compost - a double win!

WHERE DO MY FOOD SCRAPS GO?

Luckily, we benefit locally from your actions by composting at our local Coachella Valley and Edom Hill Compost Facilities! Food scraps in a landfill create methane, a potent greenhouse gas that traps CO2 and contributes to global warming.

WHAT TYPE OF BAG CAN I USE?

Any type of bag can be used. For example, vegetable store liners and bread bags. They do not need to be biodegradable.

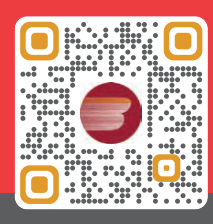

READY TO COMPOST?
